- Cover letter
- Attachment I – Price Schedule
- Attachment II – Special Clauses/Wage Rates
- Plans and Specifications

US Army Corps of Engineers
Kansas City District

METHOD OF ISSUE AND RECEIPT

- E-mail, CD, or paper
- Mail, hand carry, or electronic (e-mail or fax)

US Army Corps of Engineers
Kansas City District

SOLE SOURCE TASK ORDERS

- An urgent need exists and seeking competition would result in unacceptable delay.
- Only one contractor is capable at the level of quality required because the requirement is unique or highly specialized.

US Army Corps of Engineers
Kansas City District

SOLE SOURCE TASK ORDERS

- It is in the interest of economy and efficiency as a logical follow-on to an order already competed.
  - If task order not competed (i.e., any of the other exceptions are used for the original award, this exception cannot be used for follow-on effort.
- In order to get a contract awarded before the acceptance period expires. (Minimum guarantee award)

US Army Corps of Engineers
Kansas City District

COMPETITION REQUIREMENTS

- Competition requirements will be determined for each Task Order independently.
  - For Full and Open – all MATOC contractors will be allowed to compete.
  - For 8(a) – Only the 8(a) contractors will be allowed to compete.
  - For HUBZone – Only the HUBZone contractors will be allowed to compete.
- The HUBZone contractors will not get the 10% pricing preference. Per the FAR it is not allowed in IDIQ contracts.

US Army Corps of Engineers
Kansas City District

BASIS FOR AWARD

- Lowest Responsible Price
- Best Value
  - Past performance on earlier Task Orders under the MATOC
  - Quality, timeliness, or other factors
  - Specialized experience

US Army Corps of Engineers
Kansas City District

TASK ORDER

(sample provided)

- Contract clauses in the base contract are effective for each Task Order.
- Bonding will be required for each Task Order. Remember that Power of Attorney must have an original signature.
  - Bid bonds will be required for proposal to be considered for award.
  - Performance and Payment Bonds will be required for each task order.
- Design/Build. Level of design is anywhere from 0%–100%.

US Army Corps of Engineers
Kansas City District

CONTRACT PERIOD

Contract period will be three years from the date of award of the first MATOC contract within the awards made under each solicitation.

All contracts within each solicitation group will end on the same date.

US Army Corps of Engineers
Kansas City District

Contract Shared Capacity per MATOC

Full and Open **shared** capacity between the two contractors is $30 million.

8(a) **shared** capacity between all three contractors is $30 million.

HUBZone **shared** capacity between all three contractors is $20 million.

US Army Corps of Engineers
Kansas City District

Importance of Quality and Timeliness

- It is important to consistently do good work no matter the size or location of the project.
- Your performance on each and every task order reflects on (a) your firm, (b) the MATOC system as a whole and (c) on the Kansas City District.
- Previous less than stellar experiences on any one of the MATO contracts will influence our customers away from using this contract vehicle.

Kansas City District

ACQUISITION STRATEGY

- The Acquisition Strategy Board reviews each project that is estimated to cost more than $100,000. Regardless of size the acquisition strategy is reviewed by the Project Delivery Team and the Contracting Officer. We anticipate a steady stream of construction projects over the next 6+ months.
